Hi! NIK HERE!

Early into my teaching career, I discovered that traditional piano curriculum **does not** teach adults how express the music they feel inside. What happened to flow, actually feeling the rhythm and enjoying what you're playing (eyes closed of course)?!?

So, at 15 years old, I set on a mission to develop my own curriculum.

After many years of paying attention to what I was *actually* doing when I played, I was fortunate enough to crack the code. So, I developed unique exercises and tested out methods to help adults like you work up to eventually sounding like me. And the crazy thing is, it worked!

If you have a dream of playing freely, being able to fill out songs you love using dynamic rhythm, and learning how to sound natural, then you're in the right place.

— NIKOLAS
